Dear Roger:

I would like to thank you for introducing us to the Hydro Life water filtration systems.

Being a Cornelius distributor we had used Everpure systems for years with what we thought were good results.

When we began installing the Hydro Life systems we soon learned what lime/scale reduction really was and how much difference truly good tasting water can make in fountain pop, coffee and the food served in our customers restaurants.

Our customers are pleased and therefore so are we. Thank you again for helping us find another way to serve our customers better.

Sincerely,
David Shirk
Sales Manager
